

# Bumper Car game Numbers to 10

## Included in this pack

- Bumper Car page with a 10 frame
- Number page with numbers to 10

## What you'll need

- Card (or paper) to print on
- Scissors
- Maths counters/cubes etc (any marker you can fit in the ten frame)

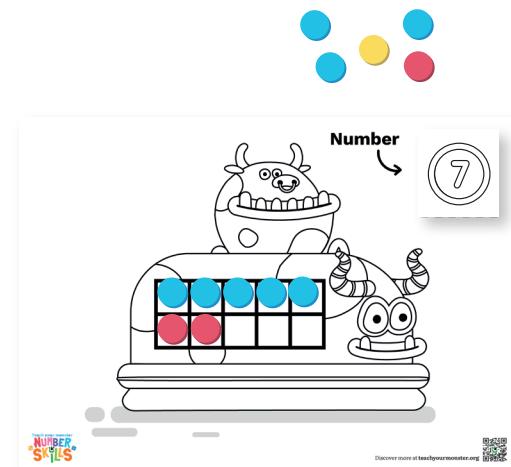

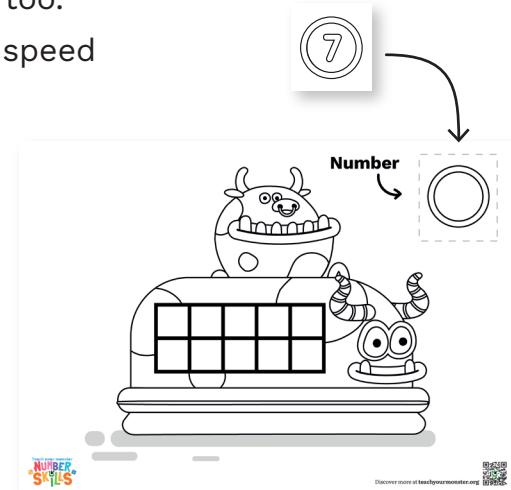

## Instructions

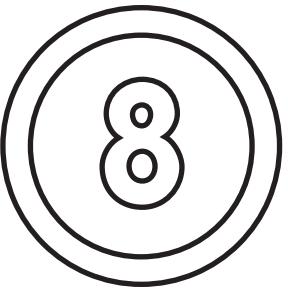

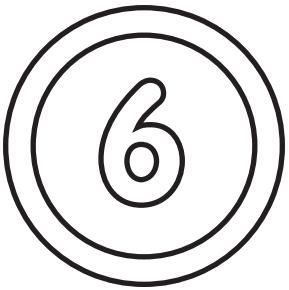

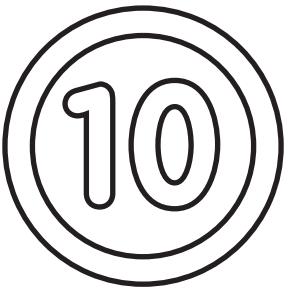

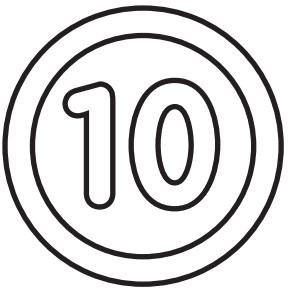

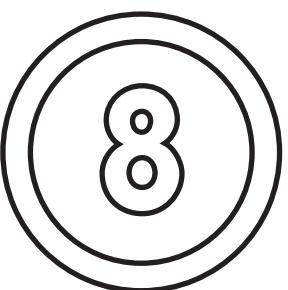

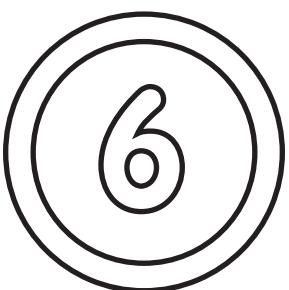

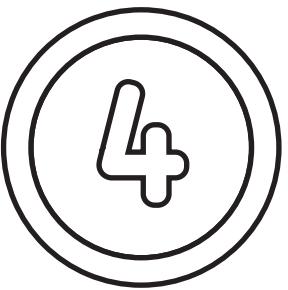

1. Print both sheets. We recommend card so that the numbers can't be seen from the other side, but paper will work too.
2. Cut out the number discs (this can be cut straight for speed or with the circles)
3. Children can colour the pieces if they like!

## To play:

1. Get into pairs. Decide who goes first.
2. The first player shuffles the number discs and then picks one to place at the top of the Bumper Car page.
3. The guessing player has to fill up the bumper car with enough counters to knock the first player off the track!
4. The first player can check the number is correct and if so... wooosshhhh! The guessing player wins!
5. If not, help each other to get the right number. Well done! Now go back and play again but the first player is now guessing.

**TIP: You could also make this a full class activity - print only the Bumper Car page for the whole class and pick a number for them to make!**
