

# Number Skills Work Station Table Sheet

## Included in this pack

- Instructions
- Number Skills Table Sheet

## What you'll need

- Laminator (optional)

## Instructions:

This printable is designed to use in the classroom when you are working with Math stations, centres or as part of a carousel.

Print a copy of the next page for each station that will be working with Number Skills and write down the focus on the table sheet. We've included a space for the numbers you'd like the kids to work on, and the game you'd like them to play.

You can allow them to play through the Adventure Mode using their own monster or using 'Practice Mode'. Practice Mode works on choosing a skill, number or game. We suggest looking through Practice Mode first to see what would be suitable for your class.

For more information on 'Practice Mode' please visit our Teachers Area on our website at [www.teachyourmonster.org/teachers-area](http://www.teachyourmonster.org/teachers-area)

**TIP: We recommend laminating the printout so that you can re-use it everytime you use Number Skills in class.**
