

Hi there,

Teach Your Monster is an award-winning suite of games which help children to master the early learning skills. Their most popular games are:

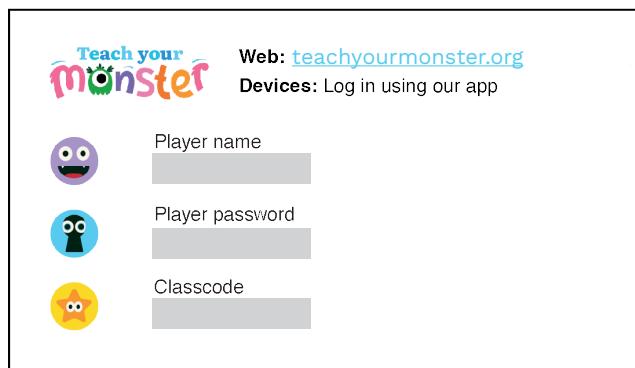

**Teach Your Monster to Read** - an early phonics and reading game that makes learning to read fun.

**Number Skills** - an early mathematics game that builds a strong foundation of number knowledge.

We're using these at school and your child will benefit more from the game if they can play at home.

The games are free to play on a computer or laptop at [teachyourmonster.org](http://teachyourmonster.org), and app versions can also be purchased for mobile and tablet.

If we've given you a password card, you can add your child's monster to your home account using these details. To add your child:

A screenshot of the Teach Your Monster login page. It features the logo at the top left. To the right, there are two login options: 'Web: [teachyourmonster.org](http://teachyourmonster.org)' and 'Devices: Log in using our app'. Below these are three input fields: 'Player name' with a placeholder icon of a purple monster, 'Player password' with a placeholder icon of a blue monster, and 'Classcode' with a placeholder icon of a yellow star.

1. First create or login to your Home account.
2. Choose to create or add a player.
3. On the create/add player screen, choose the 'Add existing player' option located underneath.

They also have:

**Reading for Fun** - after Teach Your Monster to Read, use this game to promote reading for pleasure. Go on an adventure to collect and read over 70 e-books!

**Adventurous Eating** - a brand new learning game that gets kids excited about fruit and vegetables! Perfect for picky eaters!
